

# ANNOUNCEMENT

## 2026 DSATools™ User Group Meeting

**Powertech** is pleased to announce the 2026 DSATools™ User Group Meeting (UGM). This annual event provides a forum for Powertech and the DSATools™ users to discuss and exchange ideas for the development and applications of DSATools™ software. Attendees will receive an overview of Powertech’s latest software product features, see demonstrations of real-world applications, and learn about new and upcoming developments. The meeting will also feature presentations from users who will share their experiences and practical applications of DSATools™.

This year’s User Group Meeting will be hosted in **Vancouver, BC, Canada**.

As part of the event, attendees will have the opportunity to participate in a half day tour of **Powertech** and **BC Hydro Control Center**. Transportation to and from the meeting hotel to the tour locations will be provided. During the tour, Powertech will showcase their laboratories, and BC Hydro will present the reliability requirements for operating the British Columbia power system as well as its application of an On-Line Dynamic Security Assessment system using DSATools™.

Please RSVP at <https://dsatools.com/2026-dsatools-user-group-meeting/> by **August 31<sup>st</sup>, 2026**. Note that the attendance for the BC Hydro control center tour is limited, so we encourage early registration. All control center tour participants will be subject to security clearance by BC Hydro and will be required to provide their name and identification in advance of the tour.

If you wish to share your experience in applying DSATools™ by presenting at the UGM, please contact us at [dsainfo@powertechlabs.com](mailto:dsainfo@powertechlabs.com).
